# Amber's smile

Crowding/deepbite Class II with deep bite and arch deficiency

## Patient opinion of smile:

Amber had always been self-conscious of her overbite and had experienced jaw pain and issues when eating and wanted to boost her confidence whilst also improving her overall oral health.

### Treatment Class

Class II

### Course of treatment

18 months

### Total Number of Aligners

36 upper aligners & 28 lower aligners + refinements

## Before Treatment

## After Aligner Treatment

# Chloe's smile

Chloe 26 years of age with a Class I case with crowding average of 4mm

## Patient opinion of smile:

Chloe expressed worry regarding the crowded and misaligned positioning of their teeth, alongside a noticeable midline shift, this led to her being self-conscious often opting to keep her lips closed when smiling.

### Treatment Class

Class I

### Course of treatment

8 months

### Total Number of Aligners

16 for both upper and lower arch

## Before Treatment

## After Aligner Treatment

# Toni's smile

Toni's smile had crowding in upper and lower arch.

## Patient opinion of smile:

Toni desired to enhance her smile, as she found it lacking in aesthetic appeal and experienced anxiety in situations when having her photo taken. She sought to undergo aligner treatment to boost her confidence and smile more freely in various social settings.
